

Michigan State, County, City and Minor Civil Division Population Counts, 1800-2000

Compiled by Grace York
University of Michigan Library
2007

NOTE:

Michigan entered statehood in 1837. The Census Bureau provided a statewide total beginning in 1800. The 1810 county data was actually district data. County data became regularized in 1820. Detroit City totals began in 1820 and Monroe City in 1840. The system of reporting minor civil divisions within counties began in 1850. A minor civil division is a township, a city, or a village.

The data for this tome was primarily extracted from U.S. Census Bureau reports found at: <http://www.census.gov/prod/www/abs/decennial/index.htm>
Exact URLs are found at the beginning of each section to assist users in verifying the data and providing good bibliographic citations.

STATE OF MINNESOTA.

NOTE.—The marginal column marks townships and land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships or land-survey townships in which they are respectively situated. The population of each township or land-survey township includes that of all towns situated in it.
