

## **LET THE STORM ROLL THROUGH**

To many beers Sunday morning  
I've just got to ride it out, got to ride it out  
Numb all my fears only for a moment  
There don't seem to be enough tears they all just run out

### Chorus

It was you only for a moment  
It was you only for a moment  
Let the storm roll through

Sampson and Delilah was that a healthy relationship?  
She tried to take all the strength of that man  
But that's life and love sweet love  
We are not going to make it out of this life alive  
Sometimes you have to lose to win  
To truly understand you have to look within

### Chorus

Liven in tornado country parallels love  
You never know when it is going to drop out of the sky  
Cuddle up between your thighs  
Open up your mind and let the storm roll through

### Chorus

I had to take all the pictures of you off the wall  
Through them in a hole in my memory  
They keep bubbling up to take over me  
Can't look back because all I see is you and me

### Chorus
