Postdoc position in cosmology  
at the University of Michigan

The Department of Physics at the University of Michigan invites applications for a postdoctoral position in theoretical cosmology starting in the Fall of 2016. The successful candidate will work with Prof. Dragan Huterer and other members of the Michigan cosmology group. We are looking for a candidate whose expertise lies in one of the following topics: large-scale structure, or cosmic microwave background radiation and dark energy. Familiarity with numerical techniques and data analysis is preferred though not required.

The University of Michigan has a very active program in cosmology, spanning the fields of experimental and theoretical cosmology, astrophysics, and particle physics. Michigan Center for Theoretical Physics (MCTP) and Michigan Institute for Research in Astrophysics (MIRA) attract top astronomers and physicists through its conferences and visitor program. Michigan is an active member of the DES and DESI experiments. The candidate will be urged to take advantage of this vibrant atmosphere.

The position is initially for one year at a time, renewable for up to three years total. Applications and recommendation letters should be sent to Academic Jobs Online (AJO), https://academicjobsonline.org/ajo/jobs/6514. Applicants should submit a curriculum vitae and a description of research interests, and should arrange for three letters of reference to be submitted. The deadline is January 1, 2016, but applications will be considered until the position is filled. University of Michigan is an equal employment opportunity/affirmative action employer.
