Abstract Submission Information

SRNT encourages submission of abstracts describing cutting-edge research in nicotine and tobacco. Abstracts should summarize empirical research findings that have not been published or presented elsewhere before the meeting. The Society invites submissions for organized symposia as well as individual paper and poster presentations. All abstracts will be evaluated on the basis of scientific merit by peer review. Additionally, preference for symposia will be given to those submissions that address a substantive issue by integrating across two or more different areas of SRNT research (e.g., pre-clinical, clinical and public health/policy). The SRNT Program Committee will make decisions regarding acceptance of submissions and notify corresponding authors in December 2007.

Authors will have the opportunity to edit their submitted abstract up until 12:00 midnight (CST) on September 14, 2007, the submission deadline date. Please note that abstracts describing “work in progress” will not be considered for program inclusion, nor will abstracts that do not present empirical findings. Funding information is required for all submissions.

The on-line abstract submission system will be available on Friday, August 3, 2007. Please visit us online at www.srnt.org.

Deadline for Receipt of Abstracts

Submissions must be received electronically and no later than 12:00 midnight (CST) on Friday, September 14, 2007 to be considered for inclusion in the program. Please refer to the SRNT website for specific instructions at http://www.srnt.org. In order to streamline the process of collecting speaker documents, you will be asked to provide some additional information or forms at the time of submission. If you are unable to submit your abstract electronically, please contact the SRNT National Office no later than Monday, August 27, 2007. If you need additional copies of the Call for Abstracts information or have any questions or concerns, please call +1-608-443-2462, ext. 145.

Presentation Formats

**Poster Format:** Poster sessions allow presenters to discuss their research with interested colleagues over a period of 90-120 minutes in an informal setting. No other sessions will coincide with the poster sessions in order to maximize exchange of results and promote communication among researchers with common interests.

**Paper Format:** Abstracts that cluster around common themes may be selected for oral presentations of approximately 15 minutes each. Please note that program time constraints limit the opportunity for lengthy oral presentations.

**Symposia Format:** Selected symposia examine important issues from a variety of perspectives and have compelling supporting data. Over a 90-minute period, three or four speakers and a discussant present and/or debate alternative solutions, interpretations or points of view on a body of knowledge. Please note that symposia submissions are reviewed competitively and not all submissions will be included in the final program.

Preference will be given to symposia that are especially timely, or that span a range of disciplines. Again this year, individual symposium abstracts will have the option of being considered as a paper or poster submission in the event that the overall symposium is not selected for presentation at the meeting.

Abstract Submission Categories

Poster Only Submissions: Abstracts submitted for “poster only” will be considered for inclusion in one of the poster sessions and will not be considered for any other format.

Paper Only Submissions: Abstracts submitted for “paper only” will be considered for a short oral presentation and will not be considered for any other format. This option should only be selected if the authors would decline an opportunity to present their work as a poster presentation.

Paper or Poster Submissions: Abstracts submitted as “Paper or Poster” will be considered for inclusion as a paper first. Abstracts not selected for an oral paper presentation will automatically be considered for a poster presentation.

Symposia Submissions: Symposia submissions must include an overview abstract and an individual abstract for each of the speakers. Individual symposium abstracts will have the option of being considered as a paper or poster submission in the event that the overall symposium is not selected for presentation at the meeting. The individual submitting the symposium is responsible for communicating with the abstract presenters in that symposium.

Rapid Response Abstract Submission

The Rapid Response Abstract system will open Friday, December 14, 2007. The deadline for submitting a rapid response abstract is 12:00 midnight (CST) on Friday, January 11, 2008. Instructions and forms for on-line abstract submissions of rapid response posters will be available on the website in the fall of 2007.

In addition to meeting the requirements for all SRNT abstracts detailed above, rapid response submissions should describe cutting-edge, late-breaking research findings in nicotine and tobacco. Rapid response abstracts should describe data or analyses that were not available at the regular submission deadline in September 2007.

Portland is nestled between the Pacific Ocean and Cascade Range, and destinations like the Columbia River Gorge, Mount Hood, Mount St. Helens, Pacific Ocean beaches and the Oregon wine country, are easily reachable from the city center.
