“The poet has been studying biology. However, these enzymes look more like making up an alphabet soup than a primordial soup. Basic Enzyme Classification should come in handy. I found a strand of letters on the desk which I have copied down below. I think the central dogma of this puzzle is to translate these letters.”

- Know that Lipase + Kinase + Mutase + Aminoacyl synthetase
- Put Acyl transferase + Aminoacyl synthetase + Esterase + Oxidoreductase
- Map Mutase + Esterase + Oxidoreductase + Glyceraldehyde dehydrogenase
- Use Isomerase + Aminoacyl synthetase + Mutase + Esterase
