Mount Fuji

location: Japan, Asia
height: 12,388 feet

tourist climb: each year over 200,000 people climb Mount Fuji

notes:

Mount Fuji is a low-risk of eruption volcano. The last recorded eruption was in 1707.

The mountain is referred to as Fujisan, -san meaning mountain in Japanese.

The base of the mountain has been the subject of many myths in Japanese folklore, and samurai once used the wilderness there to train.
