Course Description:

This reading list aims to provide an introduction and overview to/of modern political-economy research, specifically: the positive comparative and international political economy of developed democracies and developing countries. Its readings emphasize how domestic and international political configurations (institutions, structures, etc.) and events (elections, coups, etc.) systematically produce certain sorts of economic policies and on how these comparative and international contexts might condition the effects of the policy so made. In other words, the course takes political economy primarily to mean the politics and economics of macro and international economic policymaking, policies, and outcomes, more so than (at least) three other broad areas of inquiry also referred to as political economy: (a) the microeconomics of politics, which studies how self-interested, rational policymakers make choices in a institutionalized environment, employing the utility-maximization theories and game-theoretic tools of microeconomics; (b) normative political economy, which studies, alternatively, what economic policy should be enacted to produce ideal effects or what policy would be enacted under some set of ideal circumstances that may or will not obtain; or (c) the political consequences of economic outcomes wherein political effects are treated as outputs of (typically exogenous) economic causes, e.g., the impact of economic performance on presidential approval or voting.

Requirements and Grading:

We meet 2 hours on Wednesdays for some mixture of lecture and discussion of the week’s required readings. Although everyone is responsible for being prepared to discuss all of the material every week, some of the readings are technically demanding, and the list is quite long in many weeks: a combination that renders preparing yourselves individually virtually impossible. Previous experience has taught me that I simply cannot recommend strongly enough that you form a study group to divide the readings and assist each other in preparation, so I will require such cooperative behavior. For most weeks, I will assign reading(s), as much as possible by student choice, to individual students who will serve as our resident expert on that (those) reading(s). As a resident expert, your duties include (a) preparing a detailed outline of your assigned materials, complete with two or more well and carefully conceived discussion questions; for distribution to the class and to me, (b) presenting your material and starting discussion about it in class (5-10 minutes); and (c) being ready to field any questions from me or classmates about your assigned material. (Developing your skills in skimming material and learning from the summaries and presentations of others will also be important.) The outlines will be due (to me and to each other, by email) no later than late-night Monday. The discussion questions can follow (to me and to each other, by email) no later than late-night Tuesday. Lastly, each student will prepare a final research-paper on a topic to which the student and I will agree in advance. Approach these seminar papers with the full intent of producing publishable-quality work (eventually, at least) and start them as soon as possible. We will have individualized meetings about your final-paper ideas sometime around the semester mid-point. The “further suggestions” readings and the reference lists from them and the assigned readings may be good places to begin looking for material for your seminar paper, but you should feel constrained by them neither in the breadth of the topics covered nor in the depth of their coverage.

General Participation...20% Seminar Paper...40% Resident Expert Duties...40%

Due Dates: Suggested schedule for paper-proposal meetings is around mid-November; the paper is due (to me, by email) no later than late-night Wednesday, December 18th. The resident-expert outlines are due (to me and to each other, by email) no later than late-night Monday. The discussion questions can follow (to me and to each other, by email) no later than late-night Tuesday.

1 Ideally, these outlines should be preceded by an old-format AJPS abstract (Theory, Hypotheses, Methods, Results/Findings/Conclusion); they should follow standard outline format (I,II,III,IV,..., A,B,C,...,1,2,3,...,a,b,...): the software you use likely has a template; and they must be detailed enough for your reader to summarize the article (its main arguments, approach, findings, and conclusions) based only upon a reading of the outline (use my lecture-notes outlines as an example in this regard).

2 Please give considerable thought to these questions, and think of your material also in relation to the rest of the week’s readings in doing so. We would like to use your questions as the starting point for our discussion; in fact, consider this on-the-job training for graduate-seminar teaching. One helpful step in these directions is for you to have some responses to your own questions ready, at least sketched in your head if not more-thoroughly developed.

3 Treat these presentations very seriously also; consider them on-the-job training for professional presentations. Assume we, your audience, have read your outline and at least skimmed your material. Use the presentation to show us how the argument(s), model(s), and/or empirics work(s), and to raise some issues about the material (perhaps in relation to other readings that week and/or applications, critiques, and/or extensions) that seem important to you.

4 In other words, the resident expert, you are pedagogically responsible for your assigned material.

5 “Late-night” means, at the very latest, in our inboxes when we wake the following morning, which we will assume to be 05:30.

Outline of the Course:

**Part I: Preliminaries & Background**

Week 1 (9/4): Introduction & Logistics; What is (Positive) C&IPE?

Week 2 (9/11): Basic Economic Theory for C&IPE (Part I)

Week 3 (9/18): Basic Economic Theory for C&IPE (Part II)

**Part II: The Building Blocks of Positive Political Economy**

Week 5: (10/2): Models and Tools for C&IPE (Part II)

Week 6 (10/9): Preferences, Collective Action, & Transaction Costs

Week 7 (10/16): Institutions: Perspectives, Approaches, & Theoretical Roles

**Part III: Alternative Views of the Central Conflict in C&IPE**

Week 8 (10/23): Credibility, Uncertainty, Information, & Time-Consistency: PE as a Technocratic Problem

**Part IV: Topics in Comparative & International Political Economy:**

Previously Prepared Topics (Further Alternatives Possible): Electoral & Partisan Cycles; Distributive & Redistributive Politics & Policy; Fiscal Policy (in a Global Economy); Monetary Policy (in a Global Economy); Trade Policy; Development & Growth; Reform & Transition; International Regimes, Cooperation, and Security

(11/27 is day before Thanksgiving; if class meeting voted, we may reschedule day & time; 12/11 is last scheduled day of semester but makes an oddly extra week: will vote that too.)

**Reading Notes:** Throughout the syllabus, I have indicated the more-central readings in larger (11pt.) font and the less-central readings in smaller (9pt.) font in an attempt to help render these very demanding lists more manageable. I will also try to provide some guidance to reading by e-mail and/or in Reading Notes on my web page and/or on CTools. I will try to update these Reading Notes weekly, and I may update the syllabus font-size variations indicating reading priority, and, indeed, the entire syllabus, throughout the semester. Stay tuned to announcements by e-mail and in class and check back here regularly.

**Special Accommodations:** If you think you need an accommodation for a disability, please let me know at least two weeks prior to the time when the accommodation will be needed. Some aspects of this course, the assignments, the in-class activities, and the way the course is usually taught may be modified to facilitate your participation and progress. As soon as you make me aware of your needs, we can work with the Office of Services for Students with Disabilities (SSD) to help us determine appropriate academic accommodations. SSD (734-763-3000; http://www.umich.edu/sswd) typically recommends accommodations through a Verified Individualized Services and Accommodations (VISA) form. Any information you provide is private and confidential and will be treated as such.
Part I: Preliminaries & Background

Week 1 (9/4): What is (Positive) Comparative & International Political Economy?

Week 2 (9/11): Basic Economic Theory for C&IPE

Core Concepts & Topics in Economic Theory for Political Economists:

1. How markets work, and the efficiency of market exchange under competition
   a. Supply & Demand and Harberger Traingles (Deadweight Loss: DWL)
   b. Consumer & Producer Surplus and Rents
   c. Marginals (returns, utility, productivity, etc.), Returns to Scale, & Elasticities

2. Market Failures
   a. Market power: [Natural] Monopoly, monopsony, imperfect competition
   b. Positive & Negative Externalities
   c. Information asymmetry: credibility, moral hazard, adverse selection

3. (Neo)Keynesian & (Neo)Classical Macroeconomics, with Money
   a. IS-LM (Hicks):
   i. Aggregate Supply & Demand: AS=AD => Y=C+I+G+(C-M)

Week 8 (10/23): Credibility, Time-Consistency, Uncertainty, Information (Technocratic PE)

Further Suggestions:

[Large literatures exist on “time-consistency, credibility, and commitment” (some of which appears below in the ‘topical applications Part IV’), “uncertainty & information” in policymaking, and “policy learning” or “policy laboratories”, but this section is new to this syllabus & I have not yet developed a further-readings list.]

[RE2] Chs. 3-4: Theory of (voters') institutional balancing, & the midterm cycle (68pp.)
[RE3] Chs. 5-6: Divided government, and incumbency & moderation (40pp.)

Further Suggestions:
[The literatures on partisanship, “heterogeneity” (as Drazen entitles the core of this view), and conflict of interest in political economy is absolutely massive, but this section as such is new to this syllabus so I have not yet developed an extensive further-readings list for this week per se. However, a great many of the readings from the topical modules emphasize and elaborate this view, as it represents the traditional core of PE…]

We will select 3-5 from among the Topical Modules that follow [we chose 4 in Fall 2013], taking the opportunity to update those we choose. We can also discuss substituting expanded coverage of some topic from above, or from among these modules, or from student or my own alternative suggestions for one of these modules. The previously prepared modules listed below are (alphabetically):

  - Development & Growth; Diffusion, Contagion, & Interdependence; Distributive & Redistributive Politics & Policy; Electoral & Partisan Cycles; Fiscal Policy (in a Global Economy); International Regimes, Cooperation, & Security; Monetary Policy (in a Global Economy); Trade Policy; Transition & Reform
Week 11 (11/13): Development & Growth
