**Other Issues:** The population figures used in the calculation of death rates for the age group 'under 1 year' are the estimates of the resident population that is under one year of age. [More information.](#)

Population figures in this table for 1999 are bridged-race intercensal estimates of the July 1 resident population.

Population figures for 2000 are bridged-race April 1 census counts.

The region, division, state and county population figures for 2001 and beyond are bridged-race postcensal estimates of the July 1 resident population from the Vintage 2005 postcensal series.

Death rates are flagged as Unreliable when the rate is calculated with a numerator of 20 or less. [More information.](#)
