**HOW TO FIGURE COST OF UTILITIES AND FUEL**

Enter the cost to the nearest dollar.

**Utilities**

If you don't know exactly how much you have spent and if you don't have records, put down the approximate costs.

**Fuels**

If you don't know how much fuels cost per year, one of the following methods may help you figure the approximate costs:

- **Coal**: Multiply number of tons used per year by the cost per ton.
- **Oil or kerosene**: OR multiply number of deliveries by average cost per delivery.
- **Wood**: Multiply number of cords (or loads) used per year by cost per cord (or load).

**NOTE:** If you buy fuel in small quantities (such as kerosene by the can or coal by the bag), it may be easier to figure about how much you spend for fuel per week, and multiply by the number of weeks during which it is used.

**AFTER YOU FINISH THE HOUSING QUESTIONS—**

- Fill the following pages for persons whose names have been written in by the census taker.
- Make sure that each "extra person" questionnaire left by the census taker is filled.
- Include the completed "extra person" questionnaires in the family's envelope when this form is mailed to the census office. Sheets filled by household members not related to the head may first be enclosed in the special smaller envelopes left for these persons.
