1. Sectioned perspective (1/8" = 1’)

2. Street perspective

3. Neighborhood plan (bottom) (1:4000)

Block plan (top) (1:800)

Notes:

The design is inspired by the classic gym locker. Its simple repeating unit and its desire to become independent through decoration [typically interior: stickers, graffiti, etc] seemed appropriate for use in the similar model of row housing. Neighboring units in street perspective have been de-saturated to emphasize its independence.
