

**The Habitable Planet Programme Present an exciting opportunity:  
The FASTinG Remote Learning Programme**

**Far  
Apart  
Science  
Together**  
*in Ghana!*

**Ever wondered why Earth is the only Planet known to be Habitable?**

In an age where thousands of planets are known, this question is now more pertinent and intriguing than ever before. The FAST in Ghana programme uses an innovative and engaging form of online learning, to allow students to find the answers to this question. In doing so we introduce our participants to the emerging interdisciplinary field of **Earth Systems Science**; the science of why our planet is Habitable. We believe that everyone who lives on this Planet should know how it works, sign up today to find out.

**What is FAST in Ghana?**

The ACCESS Habitable Planet programme has been working with students in South Africa for many years, and one thing we have discovered is that learning happens best face to face.

With the onset of the pandemic we worked on inventing the best possible alternative using Zoom and the FAST programme was born. We are now offering the course to students & others in West Africa. All you need to join is:

- ✓ Device with cam, mic and internet
- ✓ Enthusiasm and dedication
- ✓ A few hours a week

**When is FAST in Ghana happening?**

The programme will run from the week beginning of 5<sup>th</sup> April to the week of 24<sup>th</sup> May. Most weeks will just have 2.5 contact hours on Zoom, with a full day at the beginning and the end.

**How do I apply to join?**

It's as easy as filling out an online form:

<https://tinyurl.com/FASTinG21>

This course is free and open to everyone. Only successful candidates will be contacted.

**Deadline = 8<sup>th</sup> March 2021**
