Fifteen years ago when we arrived here, we had a large house with a garden. We planted many trees and flowers. Unfortunately, we lost some of them due to a severe storm. Today, the garden is empty and we are planning to replant it with new species that are more resistant to such conditions.

1. We also want to build a new house.
2. We need to replant all the trees and flowers.
3. We plan to install a new fence to keep the animals out.
4. We will also start a small garden for vegetables and herbs.
5. We hope to have a small greenhouse for growing rare plants.
