5 cm pass through trench, in the hope of reaching a surface. The whole table amphora was uncovered, which will be pulled in a subsequent unit. The table amphora appears to be resting on an area with much winter inclusions than the others. Throughout the rest of the trench, so at the behest of Sharon Herbert, the pass was stopped and the trench was swept in order to determine where the darker soil versus the lighter soil, in order to first remove the darker soil, so as to not contaminate whatever the lighter soil may be.

AT THE EAST END OF THE PASS, A VERY BRIGHT CHRISTIAN LAYER OF SOIL COVERING THE MAJORITY OF THE ROOM WAS DISCOVERED, VERY LIKELY SOME SORT OF SURFACE, AS IT IS BELOW THE VESSELS, WHICH APPEARS TO BE RESTING UPON IT.
