Under unit(s)

Volume 390 L

Soil: color, texture, inclusions
topsoil: grey-brown claysish loam

Pottery wt. Other finds

Ldm Turkish lime
Span BA - Ottoman - bone - skull

Description and extent

Topsoil removal. The pass started in the SW corner and radiated to the N & W. In digging, patches of lighter colored soil were seen. There is also a line of stones along the S wall. Only a small rectangular area in the SW corner was finished before the end of the day.

light grey-brown silty loam with clay, some lime content, pebbles & cobbles

Pottery wt. 15.5 kg

Ldm Kfar Hananiah
Span BA-Romm

Other finds
- bone
- coin
- metal fragment (nail?)
- flint bladelet
- short bladelet

Description and extent
This unit is a pass through the subsoil immediately underlying the topsoil. We started from the S in order to help define the wall first uncovered in 105 and worked our way N. Below the pass, the soil seems to become even lighter in colour. Beneath the pass in the N, there are more large rocks. The pass was about half done before the day ended.
Tracking Numbers:
1336) Bone x 50
1337) Obsidian bladelet
1338) scrapnel, chert bladelet with retouch on (edge
1339) Fe nail with rectangular sect.

Pottery wt. 19kg

Ldm Local Fine + Hell Cook + Span
Span BA+Holl

Other finds

- bone
- chert blade
- basalt grander
- shell

Description and extent

This unit is a deep (1.00m) pass across the southern half of the trench and moves from west to east, after completing the first pass we complete made a second pass across the same area (south half of trench - west to east). It levelled off the deeper portion around the Hunon jar. It appears that the small begins to float at the bottom of the pass.
