Other finds

End 193

The goal of this unit is to take a 10cm pass just so of the SW wall of the building in order to determine if the S. wall was constructed by cutting through bronze-age mudbrick. If mudbrick was tossed into the foundation trench for the wall. Basically, determining the nature of the mudbrick in relation to the south wall.

Only 1 additional patch of mudbrick found in the NW corner. Bottom of wall not reached.
