Wall running E-W at north side of square
preserved with pier at west end to higher elevation
east end moderate preservation level; center
is lowest

no obvious sign of a door; but possibly the
door piers were robbed from the center?
still not a deeply founded door as on walls
to the north (in archive room, etc)

Small section of chip plaster floor in
southeastern room of the trench - roughly 50x50 cm
Some terracotta pieces, completely disintegrated and
disarticulated, at south edge and visible
in bank at this elevation (465.13), probably
resting on floor level which is not visible in
bank

Floor is visible in west bank where preserved in
excavated area.

Attempt to find/trace floor in rest of room
was unsuccessful

Theoretical '1' under presumed floor level of the north putative dining room (CB28024), of which
no true trace of floor was found

In small triangular area north of wall CB28014 and west
of CB28016, the southeast corner of the dirty room
soil was rocky and dry with root, insect, and animal
activity from 2006 exposure in bank
