That is, the concept of importance & ownership of surface units does not cut across areas or types of finds. We focus on the mud brick elements, as they are the most obvious and consistent with the alignment of the gatehouse and the surrounding wall. In the north-east of the gatehouse is the south-western corner of the building. So far, we have only worked on sectors 2 and 3.

Floors/Fill/MASSALS etc. Use other side of sheet if necessary.
