Bone Handle — single fragment preserves entire handle shaft
Long thick bone carved into a rectangular shape and hollowed out to accommodate tool haft.
Both ends are very part of the edges, but enough remains to evidence the square incised lines set in from the edges.

L 11.4 cm
Max Width 3.5 cm
Th. 2.3 cm

Square in section
Heavily carved out
Solid interior

Single deep groove cut into narrow band

2 rows of small dotted incised circles extending down shaft on both wide sides.
Single row of seven dotted incised circles extending down one narrower side. 5 or 6 on other narrow side.
Glass core form.

Single body frag, closed perfume bottle.

Light blue back, white & yellow deco.

Core formed glass of white, green & yellow chevron pattern; blue core.

White with overlay of yellow work.

Core-formed Glass Flask/bottle bs

One fragment with horizontal yellow + white threads. The yellow has seams of blue running through the yellow.

Pres. H 1.8 cm
Pres. Width 1.8 cm
Th. 0.35 cm.
Black + White Coreform Bottle BS.

1 shred of coreform bottle glass - body sherd.
The vessel is comprised of alternating black + white threads of glass - which have been "dragged" to create a hung box/feathered effect.

PH 1.9 cm
PW 1.35 cm
Th. 0.2 cm

White background of black threads

Sand visible adhered to interior surface.
From the edge it is clear that a base of white glass was laid on the coreform & then the threads of white & black added on top.
