

H A E - W O N P A R K

Business Address

Massachusetts Institute of Technology
 5-017, 77 Massachusetts Avenue
 Cambridge, MA 02139-4307
 (617) 715-4309; parkhw@mit.edu

Home Address

2 Menlo Street
 Brighton, MA 02135
 (734) 272-1830

Research Interests

Control, dynamics, and design of mechanical systems, with special emphasis on the establishment and experimental implementation of control and mechanical design principles for legged locomotion systems.

Education

Massachusetts Institute of Technology, Cambridge, MA 2012-2014
 Advisor: Sangbae Kim

Postdoctoral Associate. Department of Mechanical Engineering. Research focuses on developing a high-speed running quadruped robot, MIT Cheetah 2.

The University of Michigan Ann Arbor, MI 2007-2012
 Advisor: Jessy W. Grizzle

Ph.D. Department of Mechanical Engineering, May 2012.
 Thesis: Control of a Bipedal Robot Walker on Rough Terrain.

Yonsei University Seoul, Korea 2005-2007
 Advisor: Young-Pil Park

Master of Science, Department of Mechanical Engineering, February 2007.
 Thesis: Design, Analysis, and Experiment of a Dolphin Robot

Yonsei University Seoul, Korea 1998-2005
 Advisor: Hyun-Seok Yang

Bachelor of Science, Department of Mechanical Engineering, February 2005.
 Thesis: Design of a Small Size Six-Legged Walking Robot Using Electromagnet Actuators

Professional Experience

Research Scientist MIT Mechanical Engineering Cambridge, MA 2014.6-
Post-doctoral Associate MIT Mechanical Engineering Cambridge, MA 2012-2014

MIT Cheetah 2: Developed a high-speed running quadruped robot, the MIT Cheetah 2. Conducted modeling, simulation, control design of the robot, and real-time software and mechanical hardware design.

Smart Exotendon Suit: Designed a biologically-inspired quasi-passive, exotendon device to mitigate the risk of soldiers' musculoskeletal injuries caused by extended walking.

Research Assistant The Univ. of Michigan Mechanical Engineering Ann Arbor, MI 2007-2012
 Advisor: Jessy W. Grizzle

Studied walking controller design and experimental implementation of the bipedal robot MABEL.

Research Assistant Yonsei University Mechanical Engineering Seoul, Korea 2005-2007
 Advisor: Young-Pil Park

Bio-inspired underwater robot fish: Designed and developed a bio-inspired underwater robot fish.

Passive-link-type tracked vehicle for search-and-rescue operation: Developed a tracked vehicle using passive link mechanism with compliant spring for rough terrains.

Military Service, Pocheon, Korea 2000-2003

Teaching Experience

MIT, Department of Mechanical Engineering Cambridge, MA
Biomimetics, Biomechanics, and Bio-inspired robots. Mentor
Assisted students with micro controller programming and electronics debugging at Lab. session.
Summer Visiting Graduate Student Program. Supervisor
Supervised and instructed visiting graduate student to develop real-time software for MIT Cheetah 2.

The University of Michigan, Department of Mechanical Engineering Ann Arbor, MI
Mechanical Engineering Senior Design Project, Team Instructor
Assisted students to design of passive feet for the bipedal robot MABEL.
Undergraduate Research Opportunity Program, Supervisor
Supervised and assisted students with micro controller programming and hardware design for a small bipedal robot.

Awards

Cover Article, “Identification of a Bipedal Robot with a Compliant Drivetrain: Parameter Estimation for Control Design,” *IEEE Control Systems Magazine*, vol. 31, no. 2, pp. 63-88, April 2011.

Scholarship, ILJU Academy and Culture Foundation Scholarship for the students studying abroad

Second-Place Award in a Poster Presentation Competition in the Design & Control Session at the University of Michigan Engineering Graduate Student Symposium, 2009

Scholarship, Half Tuition Waiving for Student Excellence, Yonsei University, Seoul, Korea, 2005-2007

Publicity

Project MIT Cheetah 2

TIME: New Robot Cheetah Can Run (And Jump) Without a Tether (Sep. 15, 2014)

Washington Post: New algorithm could help ‘cheetah’ robot outrun humans soon. (Sep. 15, 2014)

IEEE Spectrum: MIT Cheetah Robot Bounds off Tether, Outdoors. (Sep. 15, 2014)

MIT News: Bound for robotic glory – New algorithm enables MIT cheetah robot to run and jump, untethered, across grass. (Sep. 14, 2014)

Project MABEL

Chicago Field Museum Exhibition: MABEL on Exhibit (Jan. 2014)

IEEE Spectrum: Video Tuesday: BigDog, MABEL, and Quadrotors (Sep. 20, 2011)

CNN newsroom: Fast-moving bipedal robot with knees (Sep. 19, 2011)

ESPN Road Trip (Sep. 14, 2011)

The Discovery Channel Canada: Daily Planet (Mar. 28, 2011)

Chicago Tribune: “U-M robot Mabel clears stacked wood, may jog soon” (Jun. 13, 2010)

Engadget: “University of Michigan’s MABEL robot hits a stride, breaks a leg” (May. 25, 2010)

Professional Activities

Reviewer for the Following Journals: IEEE Transactions on Robotics, IEEE Transactions on Mechatronics, International Journal of Robotics Research, Robotica, Bioinspiration & Biomimetics,

Nonlinear Dynamics

Reviewer for the Following Conferences: IEEE International Conference on Robotics and Automation, IEEE International Conference on Intelligent Robots and Systems, IEEE Humanoids, IEEE American Control Conference

Associate Member, IEEE
