

HIPCAST <http://www.hipcast.com>

Creating audio or video post via computer (not phoning in)

Click on the AUDIO or VIDEO tab.

Essentially you have the option of recording right from the browser or uploading a pre-existing file.

Click on RECORD POST to record audio and video right from the browser (with a microphone and/or webcam). RECORD your audio or video by following the instructions.

Click on UPLOAD if you have a pre-existing audio or video file.

Enter TITLE and descriptive information when prompted. The DESCRIPTION will be the text entry of your post to accompany the audio/video file. In addition to the topic, include your name in the TITLE of the file so you can identify your files amongst the group.

Click SAVE and you will be taken to the FILE MANAGEMENT section.
