

“In the Yang Lab”

We work on the 3rd floor, of the Chem building

Loving our zebrafish, taking care of them is fun.

We use cell free systems, collecting data each day.

The lab is always spotless, not a pipette out of place.

And we say

We love working here in the Yang Lab,

‘Cause at the Yang lab we do lots of research

We love working here in the Yang Lab, in the Yang Lab.

I hit the start button, of my PCR run,

Analyzing droplets, and replicating them with code.

Yeah, we have the good life, always working with smiles

In Ann Arbor, living as a wolverine,

And we say,

We love working here in the Yang Lab,

‘Cause at the Yang lab we do lots of research

We love working here in the Yang Lab, in the Yang Lab.

We love working here in the Yang Lab,

‘Cause at the Yang lab we do lots of research

We love working here in the Yang Lab, in the Yang Lab.

“Yang Lab Rocks”

Zebrafish, Zebrafish, our Zebrafish rock
Zebrafish fins and Zebrafish scales
Eating and swimming all day long
That’s the Zebrafish in our lab

Zebrafish, Zebrafish, Zebrafish rock
Zebrafish babies and Zebrafish adults
Feeding them brine shrimp and dry food
In their spotless tanks!

They’re so healthy!
They’re so healthy!
We examine those embryo’s
Experiment time is a swell time
To make a new discovery
Don’t forget, don’t forget
To clean the tanks
Never over-feed
Keep the water flow at the right rate
Yes, our Zebrafish rock!

Yang Lab, Yang Lab, The Yang Lab rocks
Yang Lab data and Yang Lab graphs
Embryos developing from the fish
With cell-free systems

Oscillations
Oscillations
Self-organizing cells
Lab time’s a swell time
To run a PCR and test that gel.
Hurry up Hurry up
That ice will melt
Micropipette all day
Test and record in experiments
That’s the Yang Lab
That’s the Yang Lab
Yes, the Yang Lab rocks!
