

Overview of Class #10

- Multiplication recap
- Mental Math
- The Bagel Problem
- Division with fractions
- Wrap up

Multiplication Recap

- Attention to units
- Different interpretations
- $.5 \times 7$

Mental Math

a) $53 + 29$

b) $28 + 35$

c) $70 - 42$

d) $61 - 28$

The Bagel Problem

Karla has 3 dozen bagels that she wants to share equally among 5 people. How many dozen or how much of a dozen can she give to each person?

Comments about Partner Assignments

- Thorough in answering all parts of the problem
- Made great efforts to give explanations
- Need to proofread
 - Each partner is responsible for rereading assignment, both for the math and editing
 - Your work should reflect the standards of performance you will be expected to meet as a teacher
- Explanations for Cookie problem
 - Many people explained terms in equation, but there was no talk about how the set up of the equation made sense in the context of the problem

Wrap up & Assignments

- Individual assignment due tomorrow
