 hw #7 comments:

text 1: too much work!
never actually needed to
find a formula.
context of the problem:
if you use mathy words,
makes it clear why they're
relevant to the story in the
problem.

*32: Dr. Model your language
after the examples in the

text.

how to tell if you're too mathy:
"plug in x and y, formula "
solve /
confusion over variables

*36 think about rate of
change
#58 Changing the variables means that $s$
